

LISTENING HANDS SEMINARS

Module 1 - An Introduction to the Fluid Body

October 17 - 20, 2019

Zurich, Switzerland

Cost \$700 USD

The Listening Hands Seminars are for any manual therapist who wants to learn how to get more done with less effort.

You will learn to engage and augment the body's inherent organizing and self healing capacity.

The curriculum is based on the development of the Cranial Concept by Dr. William Sutherland, DO. He described a seamless continuum within the body which has become known as *The Fluid Body*. It encompasses all aspects of the whole body from dense bone to fluids, within and outside the physical body

Dr. Sutherland described a wisdom he called the "Master Mechanic". Through the fluids, it directs the embryo's development, and maintains Health throughout life.

Science tells us that 70% of the adult body is fluid. We learn to primarily relate to solid pieces - the bones, muscles, organs, etc. which make up only 30% of the body.

By interacting with the fluids, we can actively partner with the "Master Mechanic" for profound healing to occur.

Working with the Fluid Body engages the function of Wholeness.

The function of Wholeness establishes spacial order and connection in the body and its field. We can feel this as tempos, flows, dynamic fluid movements and stillness within the Fluid Body.

One can't consciously engage the body's inherent ordering function by using a forceful, direct contact.

You will learn tools to shift within yourself to allow a much broader spectrum of what is under your hands to reveal itself. This is like tuning the radio dial to receive a station more clearly.

Developing these skills will allow you to untwist and decompress bones, find the deepest level of core and connection within the body, find spaciousness in limitations, and work at the deepest levels of the body with ease for you and your client.

You will learn the use of "cranial touch" for the whole body.

Your hands will become more sensitive and wise.

About Thomas Walker

Thomas is a faculty member of the Rolf Institute® and has been a Rolfer® for 31 years. He has studied craniosacral therapy since 1993 and has over 1400 hours of training in biodynamic cranial sacral therapy.

About Gale Loveitt

Gale has been a Rolfer® for 27 years and has studied cranial work extensively and practiced biodynamic touch in all aspects of her work for 20 years. She has assisted all phases of the basic Rolfing® training as well as other CE trainings.

30 hours of CE credits
